

Federal Employee Skills Assessment

This skills assessment worksheet serves as a foundational tool to help you identify and organize your key competencies. Please note that it is not a comprehensive list and may not capture all industry-specific skills or qualifications. Use this document as a starting point to reflect on your core strengths and experiences, and tailor it further to specific job opportunities.

This worksheet is a useful tool when reflecting on personal brand, developing an elevator pitch, updating a resume and preparing for an interview. Use it to drive your career development and next steps. You are encouraged to document specific examples from previous roles for those skills that you identify as 'highly experienced' and 'competent' to provide you with documentation and content for your career endeavors.

CHARACTERISTICS VS SKILLS

A **characteristic** is a trait, quality, or inherent attribute of a person that influences how they behave, interact with others, or approach situations. Characteristics are often related to a person's personality, values, dispositions, and temperament.

Examples: Empathy, Adaptability, Integrity, Patience, Confidence

A **skill** is a learned ability to perform tasks or activities effectively and efficiently. Skills are typically task-oriented, and they can be developed and refined through practice, education, and experience.

Examples: Technical (Proficiency in software tools), Communication, Time Management, Leadership, Problem-Solving

SKILLS ASSESSMENT

Problem Solving, Research & Analytical Thinking	1. Highly Experienced	2. Feel Competent	3. Would Like to Develop
Interpretive thinking: Ability to make judgments			
and decisions based on intuition and analysis.			
Analytical and evaluative thinking: Ability to			
analyze, assess, and evaluate complex situations			
and adapt approaches as necessary.			

Pattern recognition: Ability to discriminate	
between choices and apply learned patterns to	
identify solutions.	
Qualitative research and analysis: Conducting	
qualitative research, ensuring that evidence-	
based decision-making is a central skill.	
Quantitative research and analysis: Conducting	
quantitative research, ensuring that evidence-	
based decision-making is a central skill.	
Process and program improvement: Identifying	
creative and innovative ways to improve	
processes, programs, and overall organizational	
effectiveness.	
Application of research: Synthesize research,	
analysis and expertise to make	
recommendations to agency management,	
policymaking, regulatory decisions, government	
programs/services, and development of new	
products, technologies, processes, and/or	
advancements.	
Conducting Assessments: Evaluating federal	
programs, projects, or operations to ensure	
compliance with laws and regulations, such as	
assessing environmental impact for construction	
projects or reviewing financial performance in	
grant management. It includes analyzing data,	
identifying potential issues, and providing	
recommendations for improvements or	
corrective actions based on assessment findings.	
Other:	

Facilitation, Coaching & Content Design	1. Highly Experienced	2. Feel Competent	3. Would Like to Develop
Facilitates/coaches programs and workshops: Ability to lead and coach, particularly in the context of delivering presentations or workshops.			
Facilitates meetings: Both internal and external.			

Content Design: Experience creating and designing engaging, learner-centered in-person or online course content that caters to a range of learning styles. Experience utilizing instructional design principles, ensuring courses are well-structured, interactive and aligned with learning outcomes.		
Training Needs Assessment: Experience in assessing training needs, identifying gaps, and tailoring content and delivery to meet the specific needs of individuals, teams, or organizational goals.		
Other:		

Project Management & Budgeting	1. Highly Experienced	2. Feel Competent	3. Would Like to Develop
Project planning : Ability to build out a project plan and manage the project. Experience			
utilizing project management tools holistically, such as Asana.			
Program management: Ability to manage programs, including management of program objectives, budget, timelines, people, stakeholders and compliance with regulations.			
Budget management: Ability to build out a budget and determine when and how to revise budgets as necessary. Skilled in all stages of the budgeting process, including preparation, monitoring, analysis, revisions, reporting, ensuring compliance and long-term financial planning.			
Re-scoping at-risk projects : Ability to reassess and adapt project frameworks to make them achievable despite limitations (e.g., time, money, resources).			
Basic process improvement: Identify areas for improvement and implement basic process improvements to enhance workflow or efficiency.			

Program/project management support:	
Providing technology and production support to	
programming, contributing to the successful	
execution of programs or projects.	
Events management: Experience with planning,	
managing logistics, and executing events. May	
include managing event budget, registration,	
marketing the event, securing high-level	
speakers and coordinating with vendors.	
Risk management and mitigation: Ability to	
identify, assess, and develop strategies to	
mitigate risks in projects or programs, ensuring	
smooth execution and minimizing disruptions.	
Compliance: Ensure government programs and	
operations align with relevant laws, regulations,	
and standards by providing essential guidance	
to agencies and employees. Uphold ethical,	
legal, and operational integrity by ensuring	
proper procedures are followed and addressing	
any gaps in compliance.	
Regulation and policy enforcement: Focus on	
actively ensuring compliance with federal laws	
and regulations by monitoring activities,	
reviewing permits, and conducting inspections.	
The primary objective is to enforce legal	
standards and ensure adherence to regulations	
in government operations, with a proactive role	
in addressing non-compliance.	
Cross-functional collaboration: Experience	
working across multiple departments or teams	
to coordinate and integrate efforts, ensuring	
project goals are achieved and timelines are	
met.	
Change management: Ability to manage change	
effectively within projects or programs,	
including preparing teams, stakeholders, and	
processes for transitions, ensuring smooth	
implementation of new systems, processes, or	
tools.	
Other:	
	1

Communication & Messaging	1. Highly Experienced	2. Feel Competent	3. Would Like to Develop
Produce publishable written material: Ability to			
produce high-quality written content, such as			
blogs or marketing materials, following			
organizational guidelines.			
Contributing to proposals for funding:			
Contributing to the development of proposals			
aimed at securing funding for new initiatives,			
highlighting skills in persuasive writing and			
fundraising.			
Messaging: Effectively communicate the			
organization's messaging and programming to			
both internal and external audiences.			
Managing communication: Managing both			
internal and external communication with			
stakeholders.			
Defending points of view on complex issues:			
Ability to bring a clear, informed point of view			
to complex or conflicting issues and defend it			
effectively.			
Strategic communication planning: Ability to			
develop and execute comprehensive			
communication strategies that align with			
organizational goals, ensuring consistent			
messaging across various platforms and			
stakeholders.			
Media relations: Experience in developing and			
maintaining relationships with the media,			
crafting press releases, and managing public-			
facing communications to promote the			
organization's initiatives and enhance its public			
image.			
Social media management: Experience			
managing and overseeing social media presence			
to communicate key information, engage with			
the public, and promote transparency. Creating			
content, monitoring interactions, ensuring			
compliance with government communication			
policies, and managing crisis communications			
effectively across platforms.			
Crisis communication: Effectively managing			
communication during emergencies or critical			

situations, ensuring accurate, timely, and clear information is shared with the public, stakeholders, and media. Developing crisis communication plans, coordinating responses, and maintaining transparency while adhering to government policies and regulations.		
Public education and outreach: Educating the public, businesses, and stakeholders about federal laws, regulations, and best practices. Providing training, issuing informational reports, and leading outreach campaigns to promote awareness and compliance with environmental and regulatory standards.		
Other:		

Business Development,	1. Highly	2. Feel	3. Would Like
Grants/Contract Management &	Experienced	Competent	to Develop
Stakeholder Management			
Business development efforts: Ability to guide			
the development of business strategies and			
initiatives.			
Managing relationships (General): Ability to			
build and maintain effective relationships with			
internal teams, government agencies, and			
external partners. This includes fostering			
collaboration, ensuring clear communication,			
and aligning efforts to meet organizational goals			
and comply with applicable regulations.			
Managing relationships (Stakeholders): Skilled			
in managing relationships with key			
stakeholders, including government officials,			
contractors, and community partners, to ensure			
successful program outcomes. This involves			
regular communication, addressing concerns,			
and ensuring stakeholder needs are met while			
aligning with federal policies and objectives.			
Contract management: Expertise in developing,			
reviewing, and drafting contracts in compliance			
with federal laws and regulations. This includes			
negotiating terms, managing contract			

modifications, conducting market research for		
vendors, and overseeing the performance of		
awarded contracts to ensure successful		
execution and compliance.		
Prospecting for new work: The ability to		
identify and pursue new business opportunities,		
showcasing proactive business development		
skills.		
Grants management: Overseeing the full		
lifecycle of grants, from application review to		
compliance monitoring and closeout, ensuring		
proper allocation and use of funds. Providing		
guidance to recipients, managing financial		
reporting, and ensuring adherence to federal		
regulations and policies throughout the grant		
process.		
Networking and collaboration: Leveraging		
personal and professional networks, in		
coordination with team leads, to strengthen		
inter-agency relationships and expand		
organizational opportunities and partnerships.		
Other:		

Technology & Data Management	1. Highly Experienced	2. Feel Competent	3. Would Like to Develop
Computer literacy: Proficient in basic computer			
functions, including file management, internet			
browsing, and troubleshooting common			
technical issues.			
Microsoft Office Suite proficiency: Proficient in			
Microsoft Word, Excel, and PowerPoint to			
create, manage, and present documents, data,			
and reports.			
Document collaboration: Experience with			
collaborative features in Microsoft Suite (e.g.,			
SharePoint, OneDrive, and Teams) for document			
sharing, co-authoring, and communication			
within teams.			

Providing technical support for program execution, whether for virtual platforms, media, or other technological needs. E-Learning: Moodle, Articulate, Coursera, Zoom recording, Udemy, Linkedin Learning, edX, others. CRM data management: Performing data input and managing CRM processes to maintain accurate records. Software: Data analytics tools, statistical software, and excel advanced functions. Website Development: HTML/CSS, JavaScript, CMS, SEO, others. Al: Understanding of Al concepts, tools, platforms, and/or ethical considerations. Data collection & analysis: Gathering, interpreting, and analyzing data to support decision-making and inform policy development. May include using data to identify trends, evaluate program effectiveness, and develop recommendations for policy changes or new regulations to improve operations and services. Cybersecurity awareness: Knowledge of best practices in protecting sensitive data and ensuring secure systems within federal programs and projects, including familiarity with federal cybersecurity standards and regulations. Cloud computing: Experience with cloud-based platforms and services (e.g., AWS, Microsoft Azure) for managing and hosting federal data and applications, ensuring compliance with government data management policies. Automation tools: Proficiency in using automation tools: (e.g., Robotic Process Automation tools (e.g., Robotic Process Automation, Power Automate) to streamline workflows, improve efficiency, and reduce human error in data processing or reporting. Informational Technology management: Manage the design, implementation, maintenance and security of technology infrastructure systems.		Г	<u> </u>

SPECIALIZED SKILLS

While we provided an 'Other' line in every section to capture skills that may not be reflected, if you were in a highly specialized or technical field, use this section to define the skill/context category and document your skills. For example, if you were in a highly skilled role such as a nurse or an engineer.

Skill	Context Category (i.e., Project Management & Budgeting, Communications & Messaging, etc.)
REFLECTION QUESTIONS	
 Referring to skills marked in column 1, list your experienced at, and how you hope to utilize then 	

2. Are you a subject matter expert in any specific issue areas, such as environmental policy,
nutrition, national security, or another field? If so, which skills do you typically deploy in that role to
ensure success and impact?
3. Referring to skills marked in column 3, list the top three skills you would like to grow, improve
and/or learn.
4. What is one skill you have that you haven't had the chance to use in your most recent role, but
would like to apply in future positions?
